

Net.core.wmem_max

Linux kernel setting for max socket send buffer.

Use: high throughput workloads.

Avoid: normal apps.

Anthos

Hybrid/multi-cloud Kubernetes platform.

Use: multi-cloud governance.

Avoid: simple deployments.

GKE

Managed Kubernetes service.

Use: microservices.

Avoid: simple apps.

Transfer Appliance

Offline data transfer device.

Use: >10TB migrations.

Avoid: small transfers.

J2EE application

Java enterprise apps.

Use: legacy enterprise.

Avoid: cloud-native apps.

Google App Engine

PaaS for web apps.

Use: simple apps.

Avoid: custom infra.

Cloud Dataflow

Stream/batch ETL.

Use: pipelines.

Avoid: small jobs.

Stackdriver Debugger

Live app debugging.

Use: production debugging.

Avoid: heavy tracing.

MySQL / PostgreSQL

Relational DBs.

Use: structured data.

Avoid: NoSQL needs.

NoSQL

Schema-less DB.

Use: flexible data.

Avoid: transactions-heavy.

Cloud Datastore

NoSQL document DB.

Use: scalable apps.

Avoid: joins.

Cloud SQL

Managed relational DB.

Use: MySQL/Postgres.

Avoid: global scale.

Cloud Storage

Object storage.

Use: files/backups.

Avoid: DB queries.

VPC

Private network.

Use: isolation.

Avoid: public-only apps.

Cloud VPN

Encrypted tunnel.

Use: hybrid.

Avoid: high throughput.

OpenShift / OpenStack

Enterprise platforms.

Use: hybrid infra.

Avoid: native GCP.

Minikube

Local Kubernetes.

Use: dev.

Avoid: production.

Blue-Green Deployment

Zero downtime deploy.

Use: safe releases.

Avoid: simple apps.

Canary Release

Gradual rollout.

Use: risk reduction.

Avoid: urgent fixes.

Microservices

Small services.

Use: scalable apps.

Avoid: small apps.

Interconnect

Private connection.

Use: high bandwidth.

Avoid: small workloads.

Cloud DLP

Detect sensitive data.

Use: compliance.

Avoid: general security.

Vertex AI

ML platform.

Use: ML workloads.

Avoid: normal apps.

Dataproc

Spark/Hadoop.

Use: big data.

Avoid: serverless.

Shielded VMs

Secure VMs.

Use: sensitive workloads.

Avoid: basic use.

Cloud Armor

WAF.

Use: web protection.

Avoid: internal apps.

Secret Manager

Store secrets.

Use: credentials.

Avoid: plain text.

Cloud Spanner

Global SQL.

Use: large scale.

Avoid: small apps.

CDN

Cache content.

Use: websites.

Avoid: dynamic queries.

Firestore

NoSQL DB.

Use: apps.

Avoid: analytics.

Cloud IDS

Intrusion detection.

Use: security monitoring.

Avoid: basic setups.

Cloud Functions

Serverless functions.

Use: events.

Avoid: long tasks.

Binary Authorization

Trusted containers.

Use: security.

Avoid: dev only.

Cloud Monitoring

Metrics/alerts.

Use: observability.

Avoid: none.

Spinnaker

CI/CD tool.

Use: pipelines.

Avoid: simple CI.

Transfer Appliance Rehydrator

Restore exported data.

Use: data export.

Avoid: normal ops.
