

GCP Study Guide (Quick Definitions)

Compute:

GKE - Managed Kubernetes. Use for microservices.

Cloud Run - Serverless containers. Use for stateless APIs.

App Engine - PaaS. Use for simple apps.

Storage:

Cloud Storage - Object storage for files.

Cloud SQL - Managed MySQL/Postgres.

BigQuery - Analytics data warehouse.

Bigtable - NoSQL for large scale.

Networking:

VPC - Private network.

Cloud VPN - Secure tunnel.

Interconnect - High-speed private connection.

Security:

IAM - Access control.

KMS - Encryption keys.

Cloud Armor - WAF protection.

Data:

Dataflow - ETL pipelines.

Dataproc - Hadoop/Spark.

DevOps:

kubectl - Kubernetes CLI.

gsutil - Cloud Storage CLI.

Patterns:

Microservices - Small services.

Blue-Green - Zero downtime deploy.

Canary - Gradual rollout.
